SUMMARY

With over 5 years in AI development, I specialize in Python, TensorFlow, and NLP to create transformative solutions. The highlight of my career has been the development of a predictive NLP model that improved client engagement by 40%.

EXPERIENCE

Senior AI Developer

IBM

📅 05/2021 - 10/2023 📍 Chicago, IL

- Led the development of an advanced NLP model that increased client interaction efficiency by 40% across a major product line.
- Implemented cloud-based deployment on AWS, reducing infrastructure costs by 30% and resulting in streamlined operations.
- Collaborated with cross-functional teams to integrate AI solutions in existing platforms, enhancing performance and user experience by 25%.
- Managed a team of 5 developers in designing AI-driven applications, improving output delivery time by 20%.
- Conducted weekly training sessions in TensorFlow, boosting team competency and model accuracy by 15% over six months.
- Revamped the neural network architecture, leading to a 60% reduction in model training time and resource usage.

AI Developer

Cognizant

📅 11/2018 - 04/2021 📍 Chicago, IL

- Developed a chatbot using TensorFlow and FastAPI, improving customer service efficiency by 25% in online interactions.
- Enhanced data pipelines for machine learning models, resulting in a 15% increase in data processing accuracy.
- Worked on optimizing neural network performance, achieving a 20% faster processing time.
- Utilized Spacy for text processing in a multilingual project, enhancing sentiment analysis performance by 12%.
- Engaged in extensive NLP project deployments, increasing client satisfaction rate by 40% through process automation.

Software Developer

Accenture

📅 06/2016 - 10/2018 📍 Chicago, IL

- Contributed to the development of AI-driven tools, increasing system capabilities by 35%, benefiting large user base.
- Collaborated in a team to build cloud-based services for AI applications, optimizing scalability and performance.
- Provided technical expertise on AI frameworks, resulting in improved design and deployment of AI models.
- Participated in the design of a scalable API infrastructure, facilitating a more efficient integration of AI services.

EDUCATION

Master of Science in Computer Science

University of Chicago

📅 01/2014 - 01/2016 📍 Chicago, IL

Bachelor of Science in Information Technology

Northwestern University

📅 01/2010 - 01/2014 📍 Evanston, IL

PROJECTS

Open-source Chatbot

Developed a Python-based chatbot using NLP for enhanced customer interactions. Available on [github.com/mia_williams/chatbot](#).

Automated Text Analysis Tool

Created a tool for text sentiment and syntax analysis, leveraging Spacy. See [github.com/mia_williams/text-analysis](#).

KEY ACHIEVEMENTS

Boosted Client Engagement

Designed an NLP model improving engagement by 40%, significantly advancing communication strategies.

Cost Reduction Project

Deployed cloud solutions that cut infrastructure costs by 30%, optimizing budget allocation.

Efficiency Improvement

Implemented new processes that reduced project delivery time by 20%, enhancing overall team productivity.

Training Program Success

Spearheaded a training initiative in TensorFlow, increasing team competency by 15% over six months.

SKILLS

Python, TensorFlow, FastAPI, NLP, Cloud Computing, Neural Networks
