

TechCorp Solutions

Backend Developer

Location: Remote / Hybrid

Employment Type: Full-time

Experience: 2-3 Years

Posted: January 2026

Job Overview

We're seeking a skilled backend developer to join our team and contribute to our server-side development processes. You will be responsible for designing and maintaining scalable web services, managing databases, and collaborating with stakeholders to ensure seamless integration between the front and back end.

As part of a cross-functional team, you'll work closely with front-end developers, project managers, and DevOps professionals to enhance functionality, optimize workflows, and deliver high-quality web applications.

Key Responsibilities

Backend developers are responsible for maintaining robust server-side logic and ensuring optimal application functionality. Core duties include:

- **Develop and maintain server-side applications:** Build scalable and secure web services using backend programming languages like Python, Ruby, Java, and Node.js.
- **Manage databases and data storage:** Optimize database performance using tools such as MySQL, MongoDB, or SQL Server while ensuring secure and reliable data management.
- **Collaborate with team members:** Work closely with front-end developers, designers, and project managers to ensure alignment between server-side functionality and user interfaces.
- **Implement APIs and frameworks:** Design and implement RESTful APIs to facilitate communication between server-side applications and end-user systems.
- **Conduct troubleshooting and debugging:** Identify and resolve performance bottlenecks, security vulnerabilities, and server-side errors to maintain system stability.
- **Optimize scalability and workflows:** Develop reusable code and scalable solutions to accommodate future growth.

Qualifications and Skills

To excel as a backend developer, candidates should meet the following qualifications:

Education: Bachelor of Technology (B.Tech) or Master of Technology (M.Tech) degree in Computer Science, Software Engineering, or a related field. Certifications in backend frameworks or cloud platforms (e.g., AWS or Azure) are a plus.

Work Experience: At least 2-3 years of professional experience in backend web development, including familiarity with the full software development lifecycle.

Programming Languages

Java, Python, Ruby, Node.js

Database Management

MySQL, MongoDB, SQL Server

Frameworks

Django, Node.js

Version Control

Git

Soft Skills: Strong problem-solving and communication skills to collaborate effectively with team members and stakeholders.

What We Offer

- Competitive salary and benefits package
- Flexible working arrangements (remote/hybrid options)
- Professional development and training opportunities
- Collaborative and innovative work environment
- Health insurance and wellness programs

TechCorp Solutions is an equal opportunity employer committed to diversity and inclusion.
